Prompt Tracker 29

Thank You 30

Welcome and How to Use This Pack

This pack is built so you can open it, copy a prompt, and get a useful first draft in minutes. Every prompt is original, follows the same simple layout, and is written to work with ChatGPT, Claude, Gemini and similar AI assistants.

Start in 5 steps

1. **Pick a chapter** that matches the task in front of you today.
2. **Copy the prompt** from its shaded box and paste it into your AI tool.
3. **Replace every [BRACKET]** with your real details: names, numbers, audience, goal, tone.
4. **Read and refine.** Ask follow-ups such as make it shorter, more formal, or give me three options.
5. **Save your winners** in the Prompt Tracker at the end so your best prompts are one click away.

How the prompt cards work

> **EXAMPLE Prompt title tells you the use case**
>
> The shaded text is the exact prompt to copy. Anything in **[BRACKETS]** is a placeholder you fill in, for example **[YOUR AUDIENCE]** or **[TONE]**.

Get better results every time

- **Add context.** The more specific your details, the more useful the answer. Include audience, goal and constraints.
- **Name the format.** Ask for a table, a checklist, three variations, or a word limit when you need one.
- **Iterate.** Treat the first reply as a draft. One or two follow-up messages usually double the quality.
- **Keep your voice.** Paste a short sample of your own writing and ask the AI to match its tone.
- **Verify.** Check facts, figures, names and any rules that apply to you before publishing or sending.

Privacy reminder: never paste passwords, payment details or sensitive personal or client information into an AI tool. Use placeholders or anonymized examples instead.

Prompt Customization Guide

Every prompt in this pack can be improved with a little context. Use the master template below, then adapt the pieces to your task.

The master prompt template

> Act as **[ROLE]**. My goal is **[GOAL]**. The audience is **[AUDIENCE]**. Use a **[TONE]** tone. Here is the background: **[CONTEXT]**. Produce **[OUTPUT FORMAT]** in about **[LENGTH]**. Avoid **[THINGS TO AVOID]**. Before you answer, ask me up to three questions if anything is unclear.

Six upgrades that improve any prompt

- **Set a role.** Tell the AI who to be, such as an experienced editor or a patient tutor, so it picks the right vocabulary and depth.
- **Share real context.** Paste your own notes, product details or goals. Specific input produces specific output.
- **Define success.** Say what a great answer looks like: length, structure, level of detail, what to include.
